

Dear Sirs,

As a WISP I fully support the views of WISPA. 4 of my last 5 site surveys were \*just\* out of reach of line of site gear. Lower bands and slightly higher power may just have given these people who are 10 to 15 miles from the nearest town a choice besides Sat. access. Sat. access (from those who've got it) is even less stable than their TV dish systems.

Thanks much,  
Marlon K. Schafer
